WINTER WELLNESS

Now that the weather is cooler, don't let that stop you from doing the things you love! Be prepared for the Winter season by tackling cold and flu symptoms as soon as they start.

We are here for all your trusted health advice

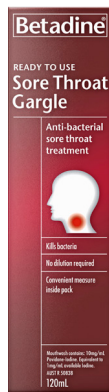

Sore throat

A sore throat can be the first indication that you may be becoming unwell. Sore throats can be caused by a virus or a bacterial infection and is also called pharyngitis, which means inflammation of the pharynx.¹

Have you had your flu shot this year?

An annual influenza vaccination is the best way for us to protect ourselves and our community during flu season.¹ Our flu season usually peaks between June and September in most parts of Australia², so if you haven't had your flu vaccination yet, now is a good time before flu season starts.

Even if you miss this timing, remember it's never too late to get your yearly vaccination, as the flu virus is in the community all year round.³

It's easy and convenient to get the flu shot at your local Pharmacy, with no prescription required. Check with us in store for eligibility - in some cases, our Pharmacist will refer you to your Doctor.

What is the difference between symptoms of the coronavirus (COVID-19) and the flu?

Both seasonal flu (which include influenza A and influenza B viruses) and COVID-19 are contagious viruses that cause respiratory illness.

Influenza⁴

- Runny nose or sneezing
- Fever and chills
- Headache
- Cough or sore throat
- Body aches
- Vomiting and diarrhoea (in children)

Coronavirus⁵

- Fever
- Shortness of breath
- Cough or sore throat
- Fatigue

If you think you or a loved one may be experiencing symptoms of COVID-19, please call ahead before visiting the Pharmacy, and contact the National Coronavirus Helpline (1800 020 080).

Whilst there is no vaccine as yet for COVID-19, there is one for the flu. Getting the flu and COVID-19 at the same time can make you very unwell, so it's still important to get your flu shot this year.

Do your bit and be an #inFLUencer this flu season – speak to us about getting your flu shot today.

WORLD NO TOBACCO DAY

In a period where we are all spending more time in the home, if you have a regular smoking habit, consider what you need to do to protect your children (or grandchildren) from the effects of smoking – both physical and emotional. Ensure they are not susceptible to second hand smoke and all of the potential health impacts of passive smoking. Quitting isn't just for you so make sure you ask our Pharmacist how we can help support you with quitting smoking.

Smoking Statistics

- at least 1 in 4 of smoking related deaths are aged 35-69
- smokers lose 10 years' life expectancy on average
- smoking accounts for 85% of lung cancers.¹

WINTER SKIN CARE

The lure of a hot shower definitely helps in getting out of bed on a cold morning. However hot water strips oils from your skin faster than warm water. Lock moisture back in as soon as you get out of the shower by moisturising.

The **Dermaveen** range contains natural colloidal oatmeal to gently cleanse and help soothe dry skin and irritation while maintaining a well functioning healthy skin barrier.

\$12.98

Did you know?

Bio-Oil Dry Skin Gel consists of 87% oil, making it an intensive moisturizer.¹

Washing your hands more often?

For temporary relief of contact dermatitis due to hand washing with soap.

TIP!

Use a soap-free wash to reduce irritation.

Lip Care: Windburn

Due to their naturally thinner skin, your lips are one of the most sensitive parts of your body. Their prominent location also makes them even more vulnerable to the elements, which can cause them to get windburn.²

The following measures can help treat dry and windburned lips:

- Stay hydrated
- Avoid hot drinks and spicy foods
- Don't pick at your lips
- Use a moisturising lip balm with SPF for added protection throughout the day

1. <https://www.bio-oil.com/au-au-en/dry-skin-gel/formulation> 2. <https://www.healthline.com/health/windburn#treatment> ¥ This product may not be right for you. Read the label before purchase. Follow the directions for use. If symptoms persist, worsen or change unexpectedly, talk to your health professional. £ When using sunscreen always wear a hat, protective clothing and sunglasses. Avoid prolonged high-risk sun exposure. Reapply sunscreen frequently or use in accordance with directions. Not all products stocked in all participating pharmacies. While stocks last. Terms and Conditions apply. Offer valid Tuesday, 12th May - Sunday, 14th June 2020. Excludes prescriptions.

Dry Eye

10mL ¥

10mL ¥

As we are all inevitably spending more time in front of the screens, with more intense blue light, it is important to keep your eyes healthy. The macula is part of the retina at the back of the eye. It's only about 5mm across but is responsible for all of our central vision, most of our colour vision and the fine detail in what we see.¹ It's impressive such a small part of our body can have such an important role! Early research shows that too much exposure to blue light could lead to digital eyestrain and/or retina damage.²
